

Digital production  
with a focus on mobile, web,  
and Web3

# UX/UI

Analytics and design for web services  
and mobile applications

# Mobile apps

Native and cross-platform apps  
for iOS and Android

# Web services

Frontend and backend

# Web3

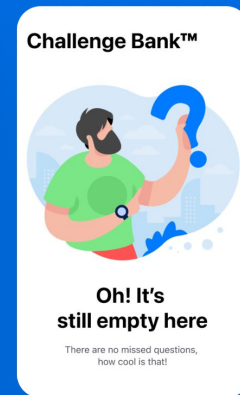

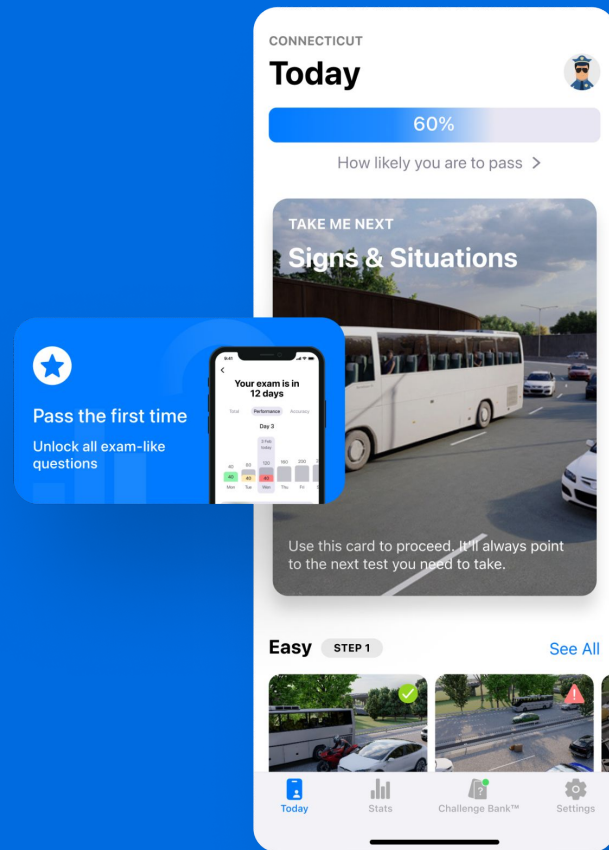

Frontend, smart contracts

We are good at doing projects,  
such as banks, neobanks, payment solutions,  
crypto wallets, e-wallets, DeFi, and GameFi

# Designed and developed 14 applications to make learning new skills easy

Applications form a big ecosystem that we have been developing for 8 years. There are apps developed for getting driver's license, nursing and law training

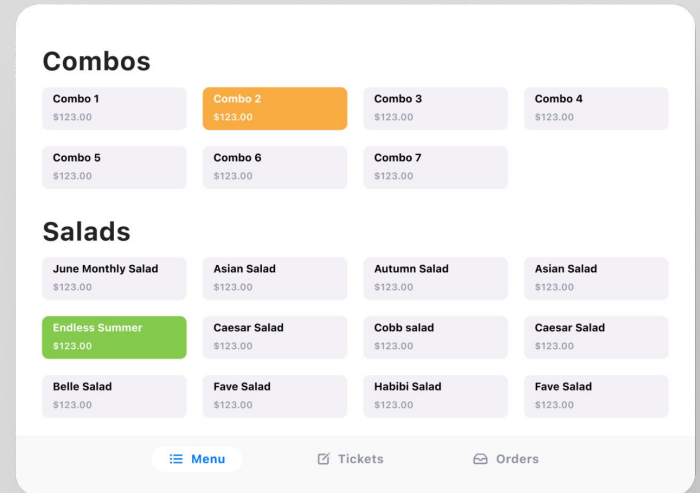

- 8 years
- 14 applications
- 6.5 million downloads
- 400,000 monthly active users
- 4.8 App Store

# Designed and developed a POS system to automate main processes in stores

Already in 2012, we helped a Canadian coffee shop deal with a large number of visitors and developed a user-friendly system. Nowadays that system has grown into a project for automated management of a restaurant business

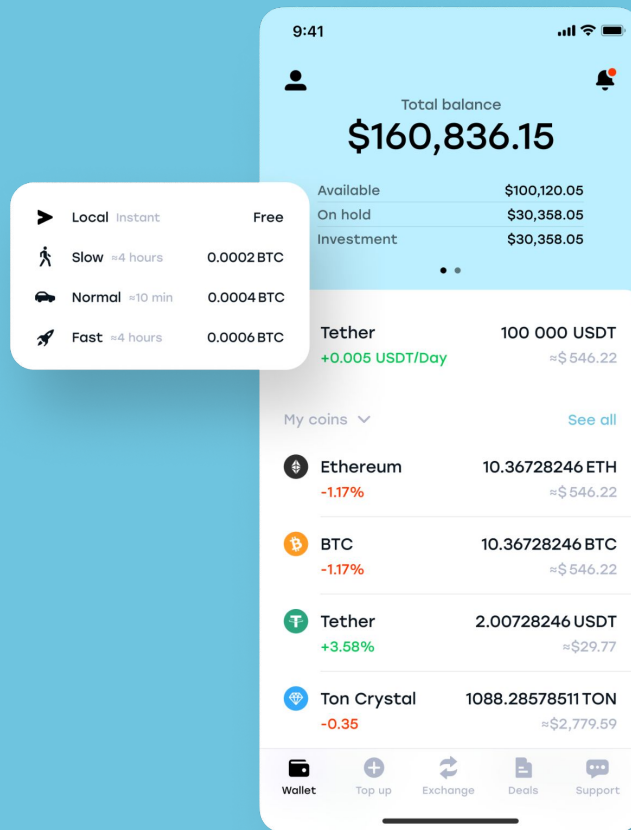

- 10 years
- 400 restaurants
- three interdependent apps and a control panel
- dealing with MEV, connecting to printers

# Designed and developed a secure crypto wallet

We've made a user-friendly crypto wallet for receiving, storing, and sending cryptocurrency to get closer to this goal. It took six months to finish the app's design and development

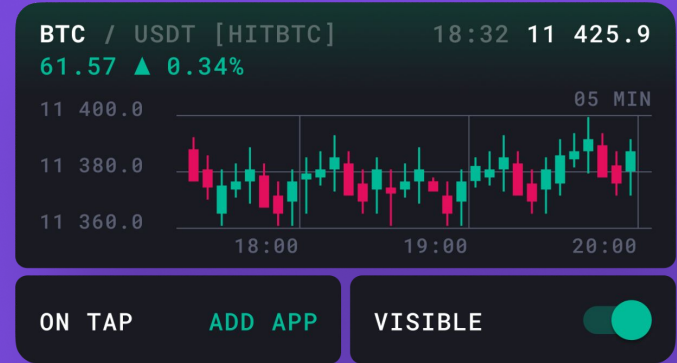

- 400 issues with successful resolution
- 99,8% crash-free rate
- 100 design layouts

# Created, designed, and developed an app to make investing easy

It is a service for crypto enthusiasts that helps to monitor the rates of Bitcoin, Ethereum, USDT, ADA as well as other cryptocurrencies in real time by means of dynamic push notifications

- 3 months for design and development
- 5 exchanges: Binance, Bitmex, Bitstamp, Kucoin, Poloniex
- 1000 types of currencies inside

React

Polkadot
